In September 2021, Chinese leader Xi Jinping announced that China would not build new coal plants overseas. At the same time, many countries in Africa and Asia continue to seek finance ...

In recent years, China has adopted a "greening the BRI" strategy, emphasising green energy projects. This brief analyses China's BRI investments in the energy sector to establish the ...

We empirically evaluate the effect of China's Belt and Road Initiative (BRI) on the energy intensity of countries along the route. Furthermore, we decompose this overall effect into direct ...

This project, along with others like the Sukkur Barrage Wind Farm, showcases the diverse low-carbon energy palette that Chinese investments could bring to Pakistan.

This paper explains the energy mix of China's overseas electricity investments across Belt and Road Initiative (BRI) recipient countries. We focus on Indonesia and Pakistan.

For this report, the definition of BRI countries includes 150 countries that had signed a cooperation agreement with China to work under the framework of the Belt and Road Initiative by ...

In the region neighboring China, Chinese companies have been involved in two large power-generation buildups - a fossil fuel-powered one in Indonesia, and a hydropower surge along ...

Filling this gap, this article assesses the opportunities and challenges of the BRI coal, hydro, wind, and solar power projects.

Power markets in developing economies have been major beneficiaries. But the rapid growth in much-needed generation capacity has also shone the spotlight on the initiative's ...

1MWh power distribution cabinet along the Belt and Road Initiative

Chinese finance and investments into the Belt and Road Initiative countries in 2024 have accelerated significantly. For 2025, a further expansion ...

"As of mid-2022, Chinese capital has supported 648 power plants overseas, representing 1,423 individual power generating units providing a total of 171.6 GW of power generation capacity," it...
