Why should you choose a 2KW Solar System?

By relying on your solar panels to power your home or business, you can significantly reduce your dependence on the grid and enjoy substantial savings on your electricity bills. It is worth noting that any excess electricity generated by your 2kW solar system can be sold back to the grid.

Can a 2KW solar system save you money?

Investing in a 2kW solar system can lead to significant savings on electricity bills. On average, this system can save up to \$621 per year. Over the 25-year lifetime of the solar panels, the total savings can amount to \$15,513. It is important to consider the rising cost of electricity when evaluating the potential savings of a 2kW solar system.

How much power does a 2KW Solar System produce?

Our 2 kW solar systems feature DIY solar kits, which will produce at least 2kW (or 2,000 watts) of power. This translates to approximately 175 to 375 kilowatt-hours (kWh) per month depending on your system choice, location and other factors. Choose between a 2kW solar kit with microinverters and a 2.4kW off-grid kit.

How much does a 2KW Solar System cost?

The typical cost for a 2kW solar system is around \$4,000. It is important to highlight that solar panel prices have significantly decreased over the past 10 years, making renewable energy more accessible and affordable for homeowners and businesses.
