What is a 47U server rack?

47U server racks and floor standing data cabinets from Server Room Environments are one of the largest available and are designed to provide a complete and secure protective enclosure system for servers, IoT, Edge computing and networking devices. The 47U rack range includes budget and premium models which can be tailored for site applications.

How do I choose a 47U rack or cabinet?

When selecting a rack or cabinet there are several factors to consider. A 47U rack or cabinet can house equipment whose total height when placed into the rack is no more than 2.09m. Care therefore has to be taken when selecting a rack to make sure that there cabinet height is sufficient to house the IT server, networking peripheral or IoT device.

How does a 47U server cabinet work?

This 47U server cabinet comes fully assembled for quick and easy deployment with pre-installed casters that let you maneuver it over a level, smooth, stable surface and through a standard two-meter doorway into position, where it can be stabilized by adjusting the levelers.

How tall should a 47U rack be?

A 47U rack or cabinet can house equipment whose total height when placed into the rack is no more than 2.09m. Care therefore has to be taken when selecting a rack to make sure that there cabinet height is sufficient to house the IT server, networking peripheral or IoT device. For reference 1U=1.75 inches or 44.45mm.

Rack cabinet servers power distribution cabinet prefabricated data center building server rack. 47U, 800mm width, 1200mm depth, 1800kgs capacity. OEM available. | Alibaba
