Tau is Translucent Energy's autonomous, containerized PV system for on- and off-grid electrification. The system includes solar modules, energy storage and an energy management system.

Power from the distribution system may be interrupted for a variety of reasons, but DG can provide power during those interruption hours. The main goal of this paper is to design and model a ...

In this research, modeling and a viability study of grid-connected and islanded photovoltaic (PV) power systems for supplying the residential load in Mekelle City, Ethiopia, were carried out con ...

Various scenarios, such as combining solar photovoltaic (PV) with pumped hydro-energy storage (PHES), utilizing wind energy with PHES, and integrating a hybrid system of PV, wind, and ...

This report of the Energy Storage Partnership is prepared by the Energy Sector Management Assistance Program (ESMAP) with contributions from the Alliance for Rural Electrification (ARE), ...

Access to reliable electricity remains a challenge for millions in remote African villages, including Lake Ziway's islands in Ethiopia. This study introduces an integrated electricity system for Tulu Gudo ...

This study introduces an integrated electricity system for Tulu Gudo Island, combining floating photovoltaics (FPV), pumped-hydro storage (PHS) and diesel generators (DGEs) to ...

In 2021, the Ethiopian government, with support from the Africa Clean Energy Technical Assistance Facility, launched the 2021 Refreshed Energy Africa Ethiopia compact. The 2021 compact seeks to ...

Our mission is to provide clean, sustainable and affordable renewable solution (for lighting, water pumping, irrigation, village electrification, Productive Use of Energy, PUE) for the off-grid sector ...
