Hitachi ABB Power Grids has been selected to deploy its innovative energy storage solution to support the development of Singapore's first Virtual Power Plant (VPP) project.

Connected together, these systems form Singapore's first battery-powered Virtual Power Plant, helping your energy assets work smarter. Earn more from your batteries by unlocking new grid revenue ...

At the heart of the VPP are modular sodium-ion battery packs, which the company claims are a safer and more sustainable alternative to traditional lithium-ion systems. These assets are ...

The Energy Market Authority (EMA) is proposing that a regulatory sandbox be set up to explore whether virtual power plants would be able to supply electricity to the grid, as conventional ...

Supply and Rental Hybrid Power Station with a system capacity of 60kWh This hybrid Generator, Solar and Battery (GSB) unit set is a state-of-the-art power solution that integrates battery system, battery ...

Our project, titled the TrueVPP Sandbox, will serve as a living testbed for virtual power plant innovation. Running over two years, the Sandbox will test the technical and operational ...

DERs are small power generation units installed by consumers to produce, store, or use electricity. These include rooftop solar photovoltaics, battery energy storage systems and electric ...

Blue Whale Energy focuses on developing and operating distributed battery systems tailored for commercial and industrial customers
