AES doubles down on solar panel installation with Maximo, a robotic system that uses AI-powered vision and continuous learning to optimize the placement and connection of solar panels in the field.

Maximo deploys solar panels in half the time at half the cost. Maximo is a true partner to solar construction crews, using artificial intelligence to automate the heavy lifting of solar panels and accelerate solar installation.

Maximo can install solar panels in half the time and half the cost, working together with on-the-ground crews to accelerate renewable energy deployment, reducing time-to-power for customers....

Maximo enhances the safety and scalability of solar installation by automating the heavy lifting for placing and attaching solar modules. It accelerates project timelines, creates new high-tech jobs and brings ...

By collaborating with on-the-ground crews, the robot accelerates the deployment of renewable energy, consequently reducing the time-to-power for AES customers. The AI-powered computer vision of ...

AES Solar is a Pearl Certified Contractor-- an elite designation held by only the top solar companies in the country. This means AES Solar delivers high-quality solar installations backed by third-party validation.

Maximo can install solar panels in half the time and half the cost, working together with on-the-ground crews to accelerate renewable energy deployment, reducing time-to-power for customers.

AES doubles down on solar panel installation with Maximo, a ...

Maximo, the world's only robot solution for the full end-to-end automation of mechanical installation of solar modules, will autonomously install a section of solar modules at AES' solar project in partnership with Amazon.

Aes solar panel installation

Maximo by AES, designed by Fuseproject, is an AI-enabled robot that speeds solar panel installation, setting a new standard in solar energy.

As the cost of both PV panels and installation continue to decrease, AES Solar will continue to expand to other countries with appropriate market structures, with the goal of achieving "grid parity" - being able to be ...
