How do you choose a cabinet lock?

Valuables or important documents may require more secure cabinet locks, such as cylinder locking cam latches, while cam locks for furniture or drawers are a good choice to protect lower-value items. Who'll use the furniture or cabinet lock? If they're intended for personal use, choose user-friendly locks that are easy to operate.

How do you secure a cabinet lock?

**Secure Fastening:** Secure the lock firmly in place with screws. Make sure that the lock is flush with the surface and doesn't move. **Test Operation:** Once installed, test the operation of your cabinet locks multiple times to ensure they function smoothly without any sticking or jamming.

Why do you need a keyless cabinet lock?

Each year, lost keys (or the fear of losing them) means cabinets are left open and vulnerable. GoKeyless is here to change that. With keyless cabinet locks, you can secure your belongings in a convenient and personalized way. Perfect for the office, kitchen cabinet locks, sensitive files, or simply keeping the baby out of the cleaning supplies.

How do I choose a smart cabinet lock?

When choosing the right smart cabinet lock, here are the key things you should consider: Look for locks that offer multiple ways to unlock-- such as RFID, Bluetooth, fingerprint, app, or passcode. The more options you have, the easier it is to access and share control securely.
