How many solar modules did China Export in 2024?

(Photo Credit: TaiyangNews) Between January and September 2024 this year, Chinese solar PV manufacturers together shipped 186.77 GW of solar modules, representing a year-on-year (YoY) increase of 18% compared to 157.65 GW exported during 9M 2023, according to InfoLink Consulting.

Did China Export more solar cells in the first 10 months?

According to Tan Youru, an analyst at BloombergNEF, China exported 212 GW of solar cells and modules in the first 10 months of 2023, some 19 percent more than exports in the whole of 2022. While the value of solar product exports from China was flat in the third quarter, volumes rose month-on-month, thanks to lower module prices, he said.

How many PV modules did China Export in 2023?

Separately, market research firm InfoLink has also released an analysis report based on customs data, which pointed out that from January to December 2024, China exported a total of 235.93 GW of PV modules, an increase of 13% compared to 207.99 GW in the same period in 2023.
