China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the...

China is miles ahead of the US (and everyone else) when it comes to solar and wind China added 318 Gigawatt (GW) of new solar capacity last year, along with 120 GW of additional wind power.

The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 GW of utility-scale solar capacity installed in the United States at the end of ...

China has been the largest global market for wind and solar power for many years, having built the world's most complete industrial chain layout. Its output and exports of products such ...

China was responsible for installing a massive 256 GW of that solar capacity. For context, it took until September last year to pass the 350 GW ...

China's solar power sector saw steady expansion in 2025, contributing significantly to the growth of the nation's overall power generation capacity, according to data released Wednesday by ...

China achieved a new milestone in its energy transition, with wind and solar power together generating a quarter (26%) of the country's electricity in April 2025, the highest monthly ...

Put another way, this means that new zero emissions electricity generation in China in the first four months of 2025 more than covered all new electricity demand growth (which was +3.8% yoy to ...

Solar power generation capacity amounted to 1.12 billion kilowatts by the end of last month, surging 48.5 percent compared to the same period last year, according to the National ...
