With over 400,000 solar panels spanning an area of 437 hectares, La Loma, which is located in the department of Cesar, is Colombia's largest solar power generation plant. With an installed capacity of ...

Colombia is making a significant leap in renewable energy with a \$2.1 billion initiative to install rooftop photovoltaic systems for approximately 1.3 million low-income families.

The Colombia solar scheme aims to enable vulnerable households to self-generate basic consumption with PV systems, reduce tax burdens, and add new solar capacity to the grid. Partial...

This ambitious project, part of the "Colombia Solar Plan," aims to replace traditional electricity subsidies with self-generated solar power, promoting sustainable energy access and ...

CONPES 4158 declares the Colombia Solar program of strategic importance, with 8,3 billion pesos for 2026-2030. The goal is to transform consumer subsidies into investment in ...

Colombia's national grid is getting stronger in 2025 with 17 new energy projects, mostly solar, boosting capacity and resilience. Discover how distributed generation, solar power, and ...

Established under Decree 0972 of 2025, the "Colombia Solar" program shifts support for strata 1-3 households from recurring state subsidies to self-supply through solar panel installations.

Colombia is advancing its energy transition with 922.8 MW of solar projects currently under construction, signaling strong growth momentum in the country's renewable energy sector.

Between 2023 and 2030, the Just Energy Transition (TEJ) scenario, the central bet of the current government's strategy, projects reaching a total installed capacity of 15.2 GW in solar energy, 2.95 ...

Colombia Solar Panel solar Power Generation Project

The Colombian government has issued Decree 0972 to encourage solar energy adoption, allowing electricity consumers to install photovoltaic generation systems of up to 5 kW. The ...
