-----

Widely deployed across Ukraine and other regions with unstable grid infrastructure, it delivers reliable power for communities, medical facilities, rescue operations, and communications - becoming ...

A solar-plus-storage system has been deployed in the eastern Ukrainian village of Donets to power the local municipality's water utility.

Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no ...

The outer surface of the container is equipped with foldable photovoltaic panels, which can be folded up when not in use to reduce volume and weight for easy transportation and storage.

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems.

The off-grid version consists of a Solarfold container which, in conjunction with a suitable additional storage container, is not connected to the public power grid and functions completely autonomously.

The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems. The lightweight, ...

The PFIC30K46P30 is a compact all-in-one solar storage system integrating a 30kW power output, 46kWh energy storage capacity, and 30kWp high-efficiency foldable PV ...

Distributed solar PV systems can qualify for the Green Tariff: a programme that enables residential systems of up to 30 kW generating electricity from renewable sources to sell it to the Guaranteed Buyer.
