What are the different types of server racks in India?

Server racks in India come primarily in three configurations: open frame racks, enclosed server racks, and adjustable server racks. Open frame racks offer excellent airflow but less security, suitable for less sensitive environments.

Why should you choose rackmanindia for server racks & cabinets?

Our products like server racks and server cabinets, crafted from premium quality materials ensure the safe and proper installation and working of the servers. The complete Server racks and cabinets range that we provide at Rackmanindia is durable, flexible and have been designed to incorporate variety of servers.

How tall is a server rack in India?

Server racks in India conform to standard dimensions governed by the rack unit (U or RU) measurement, where 1U equals 1.75 inches (44.45 mm) in height. Heights usually range from small 1U wall-mount models to expansive 48U floor-standing cabinets.

What is an enclosed server rack?

Enclosed server racks provide physical protection, dust resistance, and support integrated cooling for high-density setups. Adjustable racks offer flexibility in height and depth, allowing scalability and customisation as business needs evolve.

Explosion-proof Ex 10-inch rack boxes (SOHO racks) with IP 66 rating, designed for industrial and outdoor use in hazardous areas, can be exposed to extreme weather, water or dirt.
