-----  
How will CityLife in Milan reduce energy demand?

CityLife in Milan will feature two new office towers connected by a canopy roof resembling an Italian portico. These LEED-certified buildings, with photovoltaic roofs, will reduce energy demand by 45%. The project includes a 174,000 square metre park, the second largest in Milan, linking various site buildings.

How many energy storage projects are there in Italy?

This joint effort, which began in February 2024 with three initial projects totaling 0.4 GW, has rapidly grown to encompass 14 projects, reaching a total capacity of 2.9 GW. This expansion consolidates both companies as key players in the Italian stand-alone energy storage market.

What is BW ESS & ACL energy doing in Italy?

BW ESS and ACL Energy expand their strategic partnership in Italy, developing 14 BESS storage projects with 2.9 GW of capacity.

Why should we invest in Italy's digitised energy infrastructures?

The company's commitment translates into both proprietary solutions and adaptation - already today - to the most stringent EU requirements for digitised energy infrastructures. The Italian storage market also represents a key test bed for large-scale integration of renewables and smart grid management.

Having led a series of large BESS projects in the UK for Clearstone Energy, Digby Willoughby has relocated to Italy to focus on building the new business and Milan office.
