Why should you choose a GSM mobile base station container?

With our GSM container products, we help operators to increase their service quality by protecting their devices in open areas. In the project design of our GSM mobile base station container structures, special technical equipment is selected considering the climatic conditions of the area of use.

Why should you choose a mobile base station?

With the support of mobile base stations, they bring their customers they serve with the comfort of uninterrupted communication everywhere. Millions of mobile phone users around the world prefer operators with high coverage areas, which is the most important issue in their operator selection.

Why should you choose a stationary base station?

People move more than ever, gather in larger numbers, and ask for faster and stronger GSM signals everywhere, all the time. Stationary base stations require high capital for land and construction. More importantly, stationary stations can only be at one place at a time, Flexible Solutions for Temporary Needs.

Van Type Mobile BTS

What is a van type mobile station?

Flexible Solutions for Temporary Needs. Van Type Mobile BTS Van type mobile stations are typically preferred for short term use, especially at temporarily crowded events, such as concerts, sports games, exhibitions, and mass gatherings. Vans can be driven through any part of the city without limiting regulations.
