What is a floveyor container unloading system?

Designed to enhance the efficiency of bulk material supply chains, Floveyor container unloading systems cater to a wide array of industrial needs, from food processing to chemicals. These systems reduce downtime by ensuring rapid unloading of intermodal containers and road vehicles, while maintaining a seamless flow in production lines.

How fast can a floveyor container unload?

With material unloading rates of up to 105 tonnes per hour, a Floveyor container unloading solution can decant a 20 ft intermodal container of prilled urea in under 17 minutes. Matchless versatility and high reliability allows our conveyors to be installed as an integral part of almost any process.

What is a bulk bag unloader/discharger?

A bulk bag unloader/discharger offers efficient handling of bulk materials from large bulk bags or flexible intermediate bulk storage (FIBCs). A bag dump station is for small bag emptying and is available with optional accessories for specific material application.

With 300 employees in more than 170 countries we offer intralogistic solutions for conveying, loading and unloading, stacking and reclaiming, bagging handling and dust proofing.
