Nemaco(TM) provides high-quality, durable server rack cabinets designed with water-resistant construction to protect sensitive electrical equipment and communication networks in demanding environments.

## Corrosion-resistant server racks used in European shopping malls

For most waterproof server chassis enclosures, stainless steel or aluminum are the most suitable materials due to their combination of strength, corrosion resistance, and ability to be effectively sealed.

Constructed with ruggedized, all-aluminum chassis and state-of-the-art thermal management these powerful, yet compact, servers can withstand harsh conditions and rough terrains for both military and industrial applications.

AZE's 19" outdoor server racks and outdoor network cabinets are ideal for protecting sensitive network systems from any damage due to impacts and harsh climatic conditions.
