Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

This report will highlight the top 40 countries at the forefront of solar energy adoption, showcasing their efforts to combat climate change. Notably, China is currently leading the way in solar photovoltaic (PV) ...

This treemap chart shows the state of the world's solar photovoltaic (PV) installations as of 2024, broken down by region with the top 15 countries labeled. The chart's yellow labels indicate the country's ...

Discover the top countries with the most solar power installed in 2025. Explore global solar growth trends, annual installation rates, and how nations are embracing clean, renewable energy...

Solar energy capacity is growing rapidly, driving the global transition to renewable energy. This graphic visualizes the top 15 countries by cumulative megawatts of installed photovoltaic (PV) and ...

Data from BP's Statistical Review of World Energy 2022 and the International Energy Agency's solar energy statistics reveal the countries that are at the forefront of global solar power capacity and renewable energy as ...

Overview
Global use figures
Africa Asia Europe North America Oceania South America
Many countries and territories have installed significant solar power capacity into their electrical grids to supplement or provide an alternative to conventional energy sources. Solar power plants use one of two technologies: o Photovoltaic (PV) systems use solar panels, either on rooftops or in ground-mounted solar farms, converting sunlight directly into electric power.

A list of the top 10 countries with the most solar power energy. These figures include how much is harnessed and panels installed.

Countries with the most solar power

The worldwide growth of photovoltaics is extremely dynamic and varies strongly by country. In April 2022, the total global solar power capacity reached 1 TW, increasing to 2 TW in 2024. The top installers of 2024 ...

According to the Energy Institute's Statistical Review of World Energy 2025, there are now 18,65,490 solar power installations worldwide in 2024-25.

China, the US, and India dominate solar power in 2025, producing most of the world's clean electricity from sunlight. These ten nations collectively account for more than two-thirds of global solar ...
