How many solar parks will Cuba build by 2025?

The Cuban government's plan is to install 55 solar parks similar to the one in Cotorro by 2025. The total capacity will be 1,200 MW. These are part of a broader project running until 2028, which aims to build 92 parks, with the goal of adding more than 2,000 MW to the National Electro-Energy System.

What is the first solar photovoltaic park in Havana?

HAVANA TIMES - On February 21, 2025, the first solar photovoltaic park was inaugurated, with a capacity of 21.8 MW. The project, located in Cotorro--on the outskirts of Havana--is part of the island's government's bet on solar energy to address the country's dire electricity situation.

What is the energy situation in Cuba?

The energy situation in Cuba is critical. The Cuban electrical system has suffered for years due to a lack of investment, aging infrastructure, and difficulties in obtaining fuel. First published in Spanish by El Toque and translated and posted in English by Havana Times.

What is the Cotorro solar project?

The project, located in Cotorro--on the outskirts of Havana--is part of the island's government's bet on solar energy to address the country's dire electricity situation. According to Ricardo Mengana, director of the Renewable Energy Sources Company, the Cotorro park began operating in test mode on the Monday prior to its inauguration.

Cuba began the construction of 55 solar parks as part of its strategy to address the country's energy issues, with financing from China.

Chinese and Cuban authorities signed an investment agreement to jointly implement a project to expand the use of renewable energy. In the short term, the investment project consists of ...

The adoption of solar power in Cuba is a direct response to a deepening energy crisis driven by international sanctions and fuel supply issues. While government and private initiatives are ...

Beyond the expectations for the opening of the solar parks and the possibility of easing the country's energy crisis, how is the overall plan progressing, and what challenges does it face in ...

Cuban authorities emphasize that these solar projects align with broader plans to modernize energy systems while reducing outages. The locations chosen for the plants span multiple ...

Island nation adds 49 Chinese-built solar parks while Trump administration cuts fuel supplies by 90 percent
Cuba has transformed its electricity system in just 12 months, increasing solar power ...

Over 200 individuals honored as Heroes of Labor in Cuba have begun receiving photovoltaic modules for their homes. This initiative, touted by the government, aims to address the ...

Faced with persistent fuel shortages and the high costs of imported oil, Cuba has embarked on an ambitious plan to harness its most abundant natural resource: the sun. In 2025 ...

Cuba launches new solar parks aiming for 2,000 MW by 2028, tackling energy crisis with Chinese-backed tech and renewable energy investments.

The Cuban government announced that before the end of 2025, there will be 51 photovoltaic parks operating in the country, of which 32 are already synchronized with the National ...
