Why is the Gobi Desert a great place for solar power?

This intense dryness, as well as the abundant sunlight of more than 3,000 hours a year, make the Gobi Desert an excellent environment for large-scale solar power generation. The incredible solar-thermal power station reportedly features two 656-foot-high (200 meters) towers, each surrounded by a vast field of 27,000 mirrors known as heliostats.

What is the Gobi desert plant?

This Gobi Desert plant represents a major engineering and technological achievement, combining innovative design, energy storage, and efficiency improvements. It shows how solar thermal power can complement other forms of renewable energy and play a crucial role in providing continuous electricity.

Could a solar farm transform a desert into a power centre?

This enormous solar farm, which covers an area comparable to some small nations, turns an otherwise desolate desert into one of the world's most potent energy centres. Once viewed as wastelands, the Gobi and western deserts are now at the core of China's ambitious plan to find sustainable ways to fulfil its rising electrical demands.

How much precipitation does the Gobi Desert get a year?

It receives an average of two to eight inches of annual precipitation, with some areas receiving less than two inches per year. This intense dryness, as well as the abundant sunlight of more than 3,000 hours a year, make the Gobi Desert an excellent environment for large-scale solar power generation.

South China Morning Post, Oct 8, 2025 China has switched on a world-first solar thermal power station, located in the Gobi Desert. The station is said to be a cheaper and more efficient use ...

China has switched on a world-first solar thermal power station in the Gobi Desert that is said to be a cheaper and more efficient use of the technology with potential to be scaled up.

Use a ferramenta de busca para encontrar amigos na sua aventura.

China has activated a novel dual-tower, single-turbine solar thermal power station in the Gobi Desert, marking a world-first in its design. The facility's innovative dual-tower configuration ...
