The cabinet works very well as a stand-alone power and/or battery backup solution and provides additional space for telecom equipment.

- Cabinet design allows natural wind cooling through filtered vents on front door and venting under lip of rain hood - All fixings are internal to the cabinet to provide a secure solution

Our enclosures are built to withstand rain, dust, corrosion, and extreme temperatures, making them ideal for telecommunications, utilities, oil & gas, and industrial applications.

In addition to our superior protection features, they are equipped with a solar panel and powerful backup battery that offer an uninterrupted power supply to small electronic devices. Our solar power modules ...

Designed for remote locations, it integrates solar controllers, inverters, and lithium battery packs to ensure stable and continuous power for telecom equipment, surveillance systems, and off-grid ...

Designed with durability and environmental protection in mind, these enclosures are ideal for industries such as telecommunications, energy storage, power distribution, and outdoor monitoring systems.

The EPC 48300/2900 Series is a compact and flexible enclosure solution for housing electronics, distribution, and battery backup equipment in outdoor telecom networks.

The Solar Power and Battery Cabinet is an all-in-one outdoor energy solution that combines solar charging, energy storage, and power distribution in a weatherproof enclosure.

They transform solar-sourced DC into AC and store unused energy in high-performance battery packs, providing clean, renewable backup energy to mission-critical telecom equipment.

Distribution box under the solar telecom integrated cabinet

With integrated North American manufacturing facilities and in-house engineering expertise, we can quickly customize our cabinets and enclosures to precisely meet the needs of your specific network ...
