Battery energy storage systems (BESS) offer highly efficient, cost-effective energy storage solutions. BESS can be used to balance the electric grid, provide backup power and improve grid stability.

The Public Utilities Regulatory Authority (PURA) is pleased to inform the general public that The Authority has endorsed the deployment of 5G technology by QCELL, in The Gambia.

The flywheel energy storage system (FESS) offers a fast dynamic response, high power and energy densities, high efficiency, good reliability, long lifetime and low maintenance ...

Experience Africell's blazing 5G network in Gambia. Stream your favorite movies in 4K, make video calls with your loved ones without buffering or lag, enjoy a quality gaming experience, ...

5G base stations (BSs), which are the essential parts of the 5G network, are important user-side flexible resources in demand response (DR) for electric power system.

Africell becomes the second Gambian telecom operator to launch 5G after QCell in June 2023. Although the focus is on 5G, Africell wants to continue investments to improve the quality and ...

Considering the construction of the 5G base station in a certain area as an example, the results showed that the proposed model can not only reduce the cost of the 5G base station operators, but also ...

Base station operators deploy a large number of distributed photovoltaics to solve the problems of high energy consumption and high electricity costs of 5G base stations.

QCell launched the country's first 5G service in June 2023, and Africell followed with 5G in early 2024, with initial deployments limited to select urban areas in Greater Banjul.
