Does Ireland need an energy storage policy?

The Irish Government's Climate Action Plan 2021 set out the need for an energy storage policy for Ireland to support 75% reduction in power sector CO2 emissions by 2030. There are 10 key policy actions in the framework outlining the timings and key stakeholders involved in delivering them. Key points:

What is Ireland's Electricity storage policy framework?

The policy framework is a first of kind policy, which clarifies the key role of electricity storage in Ireland's transition to an electricity-led system, supporting Ireland's 2030 climate targets, it may be considered as a steppingstone on Ireland's path to net zero carbon emissions.

Should 'long duration' electricity storage systems be integrated into Ireland's Electricity Grid?

In this regard, greater emphasis is placed on ensuring 'long duration' electricity storage systems - systems that have the capacity to deliver electricity throughout at least a four-hour period - are integrated into Ireland's electricity grid.

Why should Ireland support energy storage?

By supporting energy storage Ireland can enable more renewable electricity on the grid, reduce our reliance on imported fossil fuels and our exposure to volatile gas commodity prices while significantly lowering our carbon emissions. November 2024
