With a 105Ah capacity, these cells provide high energy density, stability, and a long cycle life, making them ideal for solar power systems, electric vehicles, and off-grid energy storage solutions.

Explore specifications of Prismatic LFP batteries, including lithium-ion and lithium-ion phosphate technologies, offered by EVE Energy North America.

EVE LF230 3.2V 230Ah 736Wh Prismatic LFP Cell With Aluminum Shell ≥ 4000 Cycle Rechargeable for RV, EV, golf carts, ESS, and solar system. etc. Intelligent factory design, high-performance ...

What are LiFePO₄ Prismatic Cells? LiFePO₄ prismatic cells are a type of lithium iron phosphate (LiFePO₄) battery with a rectangular (prismatic) shape, designed for high-energy storage applications.

Prismatic aluminum housing structure, meet a variety of dimensional standards. *Above data comes from EVE's laboratory. Product performance may differ in different products, please contact us for ...

High Performance Low internal resistance of battery cell, high discharge rate, stable charge/discharge, long cycle life

ICR, INR, NMC, LFP, primary, rechargeable, lithium ion, lithium ion phosphate, lithium manganese dioxide, lithium thionyl chloride, CR, ER, SPC, PLM module, battery ...

Our EVE LiFePO₄ cells are 100% brand new Grade A with original label and factory QR code which are directly from EVE factory. They have well matching voltage, capacity and resistance from factory.

EVE MB56 is a 3.2V 560Ah LiFePO₄ prismatic cell, offering over 12,000 charge cycles. Can be applied for large-scale energy storage systems, commercial & industrial utility ESS.
