What is a D-curve breaker?

D-curve breakers are suitable for circuits with high inrush currents, such as motors. They handle 10-20 times the nominal current. D-curve breakers are more sensitive to tripping than B- and C-curve breakers, making them unsuitable for circuits with low inrush currents.

How to choose a circuit breaker from Klinkmann store?

From Klinkmann Store, you will find high-quality and safe Chint and Rockwell Automation circuit breakers suitable for various applications. The selection of a circuit breaker depends on the specific electrical installation and its requirements. We always recommend consulting a qualified electrician to ensure the correct choice of breaker.

Are Klinkmann circuit breakers safe?

At Klinkmann Store, we offer a wide range of high-quality and safe circuit breakers from Chint and Rockwell Automation at competitive prices. Circuit breakers from Rockwell Automation and Chint deliver excellent performance and ensure a reliable, durable electrical network.

What is a C-curve breaker?

C-curve breakers are commonly used to protect circuits with devices that have a relatively low inrush current, such as lighting, outlets, household appliances, and small machinery. These breakers handle 5-10 times the nominal current and react slower to overloads and short circuits compared to B-curve breakers, as their tripping current is higher.

Bulk buy d curve breaker online from Chinese suppliers on DHgate . Get deals with coupon and discount code! Source high quality products in hundreds of categories wholesale direct from China.
