Can you finance a battery storage system?

Recently, Peak Power conducted an energy storage finance webinar that focused on strategies available for financing battery storage system projects. The webinar aimed to provide valuable insights into financing options and strategies for these projects.

How do battery storage project financings work?

Battery storage project financings tend to have finance documents which mirror those seen in a renewables project financing, though they raise a number of additional issues, particularly in relation to structuring repayment profiles around their complex revenue streams.

Can a battery storage system be used in a C&I project?

Similarly, in C&I projects, the battery storage system is frequently built on customer-owned land and used to support the customer's existing business. This should be considered when negotiating the site control documents--particularly if the project property is subject to an existing lease.

Where should a battery storage project be located?

Site Conditions Because of the value of battery storage in storing and delivering energy close to where the energy is needed, standalone battery storage projects are typically sited as close as possible to the point of interconnection (" POI "), or, in the case of C&I projects, on customer-owned land.
