Can you finance a battery storage project?

Energy can be stored in a number of ways, depending on the source, but the most common is in chemical batteries. In this briefing, we look at some of the considerations for financing battery storage projects. Why chemical batteries? They are easily scalable.

Is battery storage a good investment?

Battery storage has less of a track record than other renewable energy assets such as solar and wind power. The lack of comfort on the part of lenders has meant that the project financing packages available have been generally unappealing, with low gearing and onerous covenants.

How does battery storage financing work?

Battery storage financing structures usually involve a greater proportion of equity funding than would be typically seen on a renewables project and a shorter tenor of facility. Cash sweep mechanisms are often seen, to ensure that free cash is used to repay debt.

Are government subsidies for battery storage a viable revenue stream?

The available government subsidies for battery storage in the UK do not currently form a sufficiently significant and stable revenue stream to ensure battery storage project financings are fundable on the basis of capacity market or ancillary services alone.

The revenue strategies project sponsors (also referred to as project owners) can pursue for their battery energy storage systems (BESS) projects. Financing structure options for standalone ...
