How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

How much does a 5 kW solar system cost in Georgia?

While a 5 kW system will only cost you \$13,173 in Georgia, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Georgia?

How much do solar panels cost?

The cost of solar panels in Georgia is currently lower than the average price of \$3.00 per watt across the United States for residential solar power systems. The size of a solar panel system affects the installation cost, with larger installations having a lower cost per watt due to 'bulk pricing'.

How much does it cost to install a solar system?

Installing a residential solar panel system -- also called a photovoltaic or PV system -- can cost between \$10,000 to \$30,000 or more. Individual costs vary significantly. On the high end, Brad in Bogart said he was quoted \$40,000 to go solar, including battery backup. The size of your system plays a big factor in the cost.
