Is Georgia a good state to install solar panels?

With higher than average electricity prices and abundant sunshine, Georgia's a pretty great state for solar energy. It may not have the best local solar incentives, but as a Georgian, you can still take advantage of solar's most valuable incentive, the Federal Tax Credit. Here's what you should know about installing solar panels in the Peach State.

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

What are the largest solar installations in Georgia?

One of the largest solar installations in Georgia is Butler Solar Project 103. As the average cost of solar drops and more large solar projects come online, more and more Georgia residents will be able to use clean, renewable energy in their homes, even without installing rooftop solar. The passage does not provide a complete list, but mentions one notable installation.

What are the different types of solar installations in Georgia?

In Georgia, there are primarily two types of solar installations: residential solar systems, which are the most common, and large-scale solar energy systems that supply energy to the electric grid.
