---

Hanergy solar panels have been used conveniently at the L'Aquila project in Italy. Hanergy's BIPV modules have been successfully integrated into facades in the Jiangsu Wujin project.

The panels are the highest efficiency, flexible, thin-film product on the market today, with >17% cell efficiency. The FLEX Series module bonds to surfaces with a simple peel-and-stick adhesive.

Hanergy's solar power generation installation solutions are redefining renewable energy with flexible thin-film technology that's turning roofs into power plants - sometimes so sleek you might mistake ...

Through global technical integration and independent innovation, Hanergy has become a world leader in thin-film solar technology.

Installing Hanergy photovoltaic panels requires more than just bolting panels to a roof. We're talking precision engineering meets renewable energy wizardry. Ever wondered why some solar installations ...

Using state of the art proprietary photovoltaic modules, we generate clean, high quality energy, offering our customers the ability to start benefiting from clean renewable energy without any upfront cost.

Each Hanergy solar panel type leverages a different thin-film photovoltaic (PV) technology, offering unique advantages in terms of efficiency, cost, and versatility. Below is a detailed breakdown of the ...

With efficiency of greater than 15%, the panel exceeds silicon performance with low temperature coefficient. In addition, the panel is designed with low system cost in mind.

Hanergy, a multinational clean energy generation company began almost 25 years ago and grew to be the World's largest thin film solar (CIGS) technology company with installed capacity over 6GW ...
