Despite the challenges faced by countries without access to solar panels, there is a significant opportunity for growth in solar energy adoption. As solar technology continues to improve, ...

In countries like Germany, balcony-mounted solar panels are all the rage. But from breaker-masking to voltage mismatches, America's grid isn't ready for it--yet. This story originally ...

Unlock your solar potential! Explore solar access rights across the United States, navigate HOA restrictions, and protect your right to install solar panels.

In this article, we explore solar schemes and regulations in the top solar-producing countries as well as some countries with big solar ambitions in the coming years.

USA TODAY's analysis found 15% of counties nationwide now have some impediment to new utility-scale wind and solar energy. Gauging those impediments required researching a variety ...

Germany's EEG is a pivotal law that guarantees feed-in tariffs for solar electricity, providing long-term contracts and financial incentives for solar energy producers. It has played a ...

Before installing solar panels, check your local zoning laws and HOA regulations regarding solar access rights. Many states require HOAs to accommodate solar installations, though ...

Paradoxically, the states most likely to do this are some that would greatly benefit from solar power, like Oklahoma, Kansas, and Nebraska. This article will list all the states with the largest ...

The Biden administration is ending a key exemption that allowed solar panel imports to evade tariffs.

A nationwide analysis by USA TODAY shows local governments are banning green energy faster than

Has the country not allowed photovoltaic panels

they're building it. At least 15% of counties in the U.S. have effectively halted new ...
