What is a home automation system?

A home automation system is the motor for your smart home. It's the software your hub runs to connect all of your devices so you can interact with them, set automations, scenes, routines, schedules, and control them all.

How do home automation services work?

While a handful of providers offer do-it-yourself options, (and some of them even require coding knowledge for the very industrious DIYers) most home automation services are delivered through professional dealers. These experts conduct thorough assessments of your home's requirements, then proceed to design, build, and install a customized system.

Is home automation a futuristic dream?

Just a few years ago, the idea of home automation was a futuristic dream, a vision of Jetsons-style technology that promised to simplify every aspect of home life. Fast forward to today, and we're living in a future that even George Jetson would marvel at, thanks to the advancements in home automation technologies.

What is a basic home automation setup?

A basic home automation setup typically includes features like a doorbell intercom and camera, smart lights, smart thermostats, motion detectors, sensors for doors and windows, as well as monitoring for smoke and carbon monoxide.
