What is a DIY solar generator?

A DIY solar generator is a self-contained and portable mini-power plant that can allow you to be 100% independent from the grid. Let's look into a few reasons why you should build a DIY solar generator for camping or off-grid living. With zero emissions, solar generators are far more environmentally acceptable than those running on fossil fuels.

How to build a solar generator?

To build your solar generator you'll need a few basic tools that include: First, you need to test the panel and the charge controller. Plug the two pigtail cords coming from the panel in the appropriate (+) and (-) sockets on the charge controller. Now, hook the controller to the battery.

Should you buy a battery for a portable solar generator?

The bought battery option is best when you build your own DIY portable solar generator. Ensuring that the chosen batteries, whether off-the-shelf or custom-built with LiPo cells, provide sufficient capacity to store and supply the necessary power for optimal generator performance.
