The tracker further provides national totals for distributed solar capacities for 31 countries/areas. For more information about inclusion criteria, please see our Methodology page.

Welcome to the Global Solar Atlas. Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for ...

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest ...

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...

Depending on the data, this can include standardizing country names and world region definitions, converting units, calculating derived indicators such ...

China has approximately 2,000 solar power stations, accounting for about 65% of the world's total solar capacity; 3. Rapid expansion has positioned ...

Utility-Scale Solar Farm Operational Capacity by Country/Area and Year (MWac) February 2026

All these outputs are based on our database of some 25,000 solar power generating stations worldwide, including both operating plant and projects in development. This is the most reliable database on ...

We hold information on most of the utility-scale solar photovoltaic power plants in operation around the world and many of those under development, where they meet our criteria.
