Do solar panels have a performance warranty?

A performance warranty, on the other hand, guarantees that your solar panels will produce a certain amount of electricity over their lifespan. Most performance warranties promise that panels will operate at 90% capacity for the first 10 years, then 80% for the remaining 15-20 years.

How long does a solar panel warranty last?

The average warranty coverage from panel manufacturers includes 25 years of coverage for the equipment and manufacturer defects and 25 years of guaranteed maximum efficiency losses. Most manufacturers don't handle installations as well, so they don't typically provide labor or roof leak warranties.

What are the different types of solar panels warranties?

There are a few different types of warranties you'll come across when shopping for solar panels: Product Warranty: This covers defects in the materials and workmanship of the panels themselves. Performance Warranty: This guarantees that your panels will produce a certain amount of electricity over their lifespan.

How long do solar panels last?

The average efficiency warranty lasts for 25 years as well, although coverage for tier-two panels and DIY solar panel kits more often lasts for between 10 and 20 years. The typical 25-year warranty usually includes a maximum first-year degradation since efficiency losses happen most rapidly right after installation.

The product warranty focuses on the physical components of the solar panels, such as glass, frames, and junction boxes. This warranty is typically shorter than the performance warranty, ranging from 10 to 25 years.
