-----  
How much does a solar project cost in Vietnam?

Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low. In January 2023, the top rate was NT\$1.49/kWh for ground-mounted solar and NT\$1.89/kWh for floating solar, with no regional or storage-based distinctions.

What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

How do solar tariffs work in Vietnam?

Under the revised tariff framework, solar installations are categorized into ground-mounted and floating types, and are further segmented by region--North, Central, and South Vietnam. Rates are adjusted based on factors such as solar resource availability, cost structure, and local grid demand. The inclusion of storage also affects pricing.

Explore the rapid growth of solar energy in Vietnam with DAT Group -- leading provider of renewable energy solutions. Discover policies, market trends, and future opportunities.

The Ministry of Industry and Trade has officially issued a new electricity generation price framework for solar power plants, applicable from 2025.

As global costs for solar, wind, and battery storage systems fall, Vietnam could replace fixed feed-in tariffs (FiTs) with standardized competitive auctions to procure clean energy at the ...

# How much does it cost to store solar energy in Ho Chi Minh City Vietnam

The Vietnam Electricity Group (EVN) announces the rooftop solar power purchase prices for 2024 from the solar power system.

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating ...

In 2025, solar energy costs in Vietnam are clearly outlined by the Ministry of Industry and Trade's policy decisions. Factors like regional pricing frameworks and plant types, along with the ...

This study examines the constraints to the uptake of Solar Home Systems (SHS) in Ho Chi Minh City (HCMC), Vietnam. SHS are photovoltaic systems which generate electricity for residential ...

The levelized cost of electricity (LCOE) for solar power in Vietnam has decreased by over 50% since 2018, making it an attractive option for both utility-scale and rooftop installations.

Vietnam's solar feed-in tariff rates in 2025 The newly released FiT rates for 2025 distinguish between ground-mounted versus floating solar projects and whether or not they include ...

Households in Vietnam could receive up to VND 3 million (\$113.9) in investment capital for home solar-plus-storage systems installed for self-consumption, or a preferential loan of up to ...
