How do I shutdown a Solax inverter?

Use the dry contact to shutdown the inverter. Set the shutdown on the SolaX Cloud APP or website. Use the Datahub1000 to shutdown the inverter. The following will introduce in detail how each method is used and the corresponding inverter model. For most inverters, there are two PINs (Dry contact) designed to fulfill the remote shutdown function.

Do you need to shutdown an inverter remotely?

In many scenarios, the customers may have the requirement to shutdown the inverter remotely. They may need to shutdown the inverter by an external switch/third party controller, or to turn off the inverter remotely by setting on their phones and PC when they're not nearby the inverter.

How do I shut down my inverter?

Recommended Shutdown Procedure: Use the shutdown feature on the machine or through the monitoring system to perform the shutdown operation. Shutting down the inverter will prevent backflow to the grid, ensuring grid stability and personnel safety.

Do Solis inverters have a remote shutdown feature?

Solis inverters include a remote shutdown feature, enabling the inverter to be powered on or off remotely using logic signals. The DRM port is equipped with an RJ45 terminal, where Pin 5 and Pin 6 are designated for the remote shutdown functionality. Example RHI- (3-4.6)K-48ES-5G Example S6-EH3P (12-20)K-H Example S6-EH3P (5-10)K-H-EU

After the AC power has been disconnected, the next step is to shut down the direct current (DC) coming from your solar panels to the inverter. This step ensures that no power is ...

There are 3 ways to remotely shutdown SolaX inverters: Use the dry contact to shutdown the inverter. Set the shutdown on the SolaX Cloud APP or website. Use the Datahub1000 to shutdown the ...

How to Turn Off Your Solar Inverter. 1. Understand Your Inverter's Specifics. Different solar inverters have different designs and functionalities. Before you begin, it's important to consult ...

How to remotely shut down the solar inverter

The shutdown procedure for a solar inverter will depend on the specific type of inverter and the system's configuration. Consult the manufacturer's instructions and follow the recommended ...

I understand this means that I am no longer able to get into the Cerbo via VRM since the internet gets shut down when the inverter gets powered off. Of course, remote access wont be ...

The instructions presented to you here could be helpful when you want to manually shutdown an inverter or more in your solar PV system. By carefully following the steps above, you ...

Use the shutdown feature on the machine or through the monitoring system to perform the shutdown operation. Shutting down the inverter will prevent backflow to the grid, ensuring grid ...

Yes, there are three ways: 1. Use the dry contact to shutdown the inverter.2. Set the shutdown on the SolaX Cloud APP or website.3. Use...

Discover how the DRM port in Solis inverters enables remote shutdown, improving grid stability and supporting renewable energy integration.

With GoodWe remote shutdown function integrated in the inverter, it is safe and efficient to shut down the inverters in a distant spot by a switch for the sake of stability of grid and security of ...
