How do you tie a rope?

Take the working end of rope A and wrap it twice around the standing part of rope B. Feed the end back through both wraps and pull snug to form a neat double-overhand knot. Seat each knot by pulling evenly on all four rope legs, then slide the two knots toward each other until they butt up against one another.

How do you tie an anchor hitch knot?

In order to tie an Anchor Hitch knot, begin by wrapping the working end of a rope around the shackle or swivel two times. Next, pass the working end through the loops created and pull to tighten. Then, wrap the working end around the rope's standing part.

How do you tie a rope to a carabiner?

Tie an overhand knot on a bight or a small Figure Eight loop at one end of your rope, positioning it at the desired anchor point. Run the free end of the rope through your attachment beam, carabiner or tie-down point. Take the working end back toward the loop and pass it through that loop, creating a simple pulley.
