Statkraft, the largest producer of renewable energy in Europe, has launched Ireland's first ever four-hour grid-scale Battery Energy Storage System beside its windfarm at Cushaling in Co Offaly.

Energy storage systems are vital to Ireland's renewable ambitions. Learn how batteries, long-duration storage and grid upgrades will help deliver clean power

We currently have more than 300MWs of battery storage capacity in operation in Ireland, making it one of the largest battery portfolios in Europe. We plan to develop a pipeline of large scale battery ...

Using focus groups and a survey with the renewable energy and storage sector, we document perspectives on the critical barriers, innovative solutions and policy gaps identified by ...

With energy prices on the rise and mounting environmental obligations, Irish businesses are seeking reliable and future-proof, cost-effective solutions to fuel their growth sustainably. Earlier this year, ...

As Ireland accelerates its renewable energy transition, commercial and industrial battery storage systems are playing a vital role in helping businesses achieve energy security and ...

Large battery storage units are now playing a bigger role on Ireland's electricity system, after a large change introduced by EirGrid and its partners last year. Before November 2025, grid-scale ...

EirGrid, the transmission system operator (TSO) for the Republic of Ireland, has launched a consultation outlining how it will procure its first long-duration energy storage (LDES) capacity.

Energy Storage Ireland is a representative association of public and private sector organisations who are interested and active in the development of energy storage in Ireland and Northern Ireland.

Ireland has taken a major step toward deploying long-duration energy storage (LDES) with EirGrid, the

Ireland Industrial Energy Storage

national transmission system operator, launching a public consultation on how the ...
