Mega solar projects are expanding faster than local governments can manage, raising major concerns for landscapes, wildlife, and nearby communities. Under the new Takaichi Cabinet, ...

The Japanese government is considering putting an end to feed-in subsidies for new large-scale solar farms from fiscal 2027 onward, sources familiar with the matter said Monday, amid ...

Japan's government is considering ending support for new major solar-power generation projects from fiscal 2027. This comes amid growing concerns about the impact such plants have on ...

Japan will target to achieve between 40% and 50% renewable energy share in its total electricity mix by FY2040 under its 7th Strategic Energy Plan that has been approved by the cabinet. ...

The Ministry of Economy, Trade and Industry on Nov. 26 announced a new target to install about 20 gigawatts of next-generation perovskite solar cells--equivalent to powering 5.5 million...

The government intends to promote business consolidation by giving preferential treatment to "certified operator" with an aim to expanding solar power generation, named as a pillar of...

In May 2021, the Japanese Trade Ministry said that Japan may require up to 370 GW of solar capacity by 2050 to reach the goal of cutting carbon emissions to zero.

To help reach its 150 GW target, Japan's Ministry of Economy, Trade and Industry (METI) plans to add 30 GW of new large-scale solar capacity by 2040. This expansion will utilize ...

In contrast with other renewables, solar generation has experienced rapid growth in Japan. In 2024, solar contributed approximately 97 TWh, representing almost 10% of the electricity ...
