---

Libya is embarking on a critical journey toward reforming its extensive energy subsidy system, a move that promises significant implications for its economy and citizens. The nation is ...

The importance of implementing 5G network in Libya is a challenging and priority issue. Implementing the 5G network will increase the capabilities of the LTT in Libya and provide better services to the ...

Government subsidies to petrol, electricity and other services have drained nearly a third of Libya's budget in the first half of 2025, according to the central bank of Libya.

In response, the project rapidly built an interim power plant management database (online in English and Arabic) and trained GECOL in its use and thereby accelerated contract management.

The EU funded LESST project emanated from this program. It aimed to support the implementation of components 1, 2, 4 and 7, with other components supported by other donors. "The stabilization, ...

Energy subsidies have become a significant burden on government finances in Libya. The pervasive nature of subsidies has led to rampant corruption, smuggling, and a diversion of resources ...

Energy subsidies in Libya are extremely generous and poorly targeted. Given Libya's substantial oil wealth, the government has historically provided fuel subsidies as a form of redistribution, effectively ...
