How big is the data centre market in Lisbon?

In Lisbon, the indicators show that the data centre market is still in an early stage in terms of real capacity. However, pipeline capacity is expanding rapidly. Although active capacity currently stands at 15MW, AtlasEdge (9.3MW) and Merlin Properties (180MW) have data centres under construction.

What is the capacity of a data centre in Portugal?

Although active capacity currently stands at 15MW, AtlasEdge (9.3MW) and Merlin Properties (180MW) have data centres under construction. Additionally, in the "early stage" (excluded from the analysis), Start Campus in Sines has 1.2 GW. Operators such as Altice Portugal, Equinix, and NOS Sistemas lead in the capital.

Are data centres expanding in Portugal?

Expanding Data Centres in Portugal: A Strategic Ma... The Cushman & Wakefield report, which monitors 32 data centre markets in the EMEA region, reveals that operational capacity across the region grew by 9% year-on-year and total market size by 16%.

Can data centres be regulated in Portugal?

In brief, although the intersection of data centres and energy law in Portugal remains largely implicit (ie, embedded within broader regulatory instruments), the latest legal developments suggest a regulatory environment for data centres that encourages operational efficiency with long-term sustainability concerns.

Lisbon's iconic yellow trams zipping through streets powered entirely by stored solar energy. While we're not quite there yet, the Lisbon Energy Storage Project Bidding process for 2025 ...
