State Key Laboratory of Multiphase Flow in Power Engineering, Xi'an Jiaotong University, Xi'an, China.
Publication Topics.

Solar power is set to remain the main growth engine, Liu said. Average photovoltaic generation hours are forecast at about 1,320 hours, roughly unchanged from the previous year.

Through the daily output sequence of wind power and PV power, simulate different power generation plan curves, and calculate the curtailment rate of discrete hydropower output.

China has also promulgated numerous regulations and subsidies to support the assessment and development of power system integrating hydro, wind, solar, and energy storage, ...

Specialization course in Wind Energy and Solar Energy. Over 40 years experience in energy projects, coordinated the implementation of small hydro power plants and wind farms in Brazil.

Australia's agency for solar research and development. ASI invests in projects that improve the efficiency and cost effectiveness of photovoltaic and concentrating solar power technologies. We also ...

Technical support for design and implementation of hydropower plants, windpower plants and solar photovoltaic power plants. Environmental studies and risk management for power plants design...

In this paper, an improved P& O method based on CV method and Atken interpolation technique is proposed in order to enhance the tracking efficiency. When the solar irradiance changes ...

In this paper, a simplified LSTM algorithm built over the architecture of Machine Learning methodology to forecast one day-ahead solar power generation is introduced.

Parabolic trough concentrated solar power (PTCSP) undergoes daily start-ups and shut-downs despite

Liu Ming Solar Power Generation

integrating thermal energy storage (TES). The PTCSP start-up process reduces its annual...
