What is the difference between the minimum value and the lower bound of a function? To me, it seems that they are the same.

Is there a smooth function approximating the minimum of a constant and a variable? Ask Question Asked 6 months ago Modified 6 months ago

If you have a hollow triangular mesh and you put a marble inside of it, will not the marble go to any of the vertices? Yes it will. Why? Because the altitude is the lowest there of all points inside of the mesh. ...

How can you use the second derivative in finding a maximum/minimum? Additional Hint: The sign of the second derivative tells you whether something is a maximum or a minimum. A ...

I'm searching for some symbol representing minimum that is commonly used in math equations.

Minimum or maximum value of a function in square roots Ask Question Asked 1 year, 10 months ago Modified 1 year, 9 months ago

Min means Minimum. So yes, it's a function that, taken two elements, gives you the minimum of those.

The Minimum Ratio Test is measuring of amount of change in the tableau if the Simplex algorithm is going to traverse along an edge (constraint) from one extreme point to another. In other ...

What is the difference between minimum and infimum? I have a great confusion about this.

We can search $[a,b]$ instead of all of $[a, \infty)$ But we also know the extreme value theorem which says that every continuous function on a closed domain reaches a maximum and ...

Minimum light intensity requirements for photovoltaic panels
