Solar deployment and electric vehicle (EV) sales broke records in 2023 and 2024. Renewables now dominate new power generation capacity, while new domestic clean energy ...

The past decade was transformative for solar, with rapid cost reductions and subsequent increases in deployment. It is now possible to envision--and chart a path toward--a future where solar provides ...

o At the end of 2024, solar was the second-largest source of U.S. generation capacity, though still a growing percentage of the U.S. electric generation mix. o In 2024, solar represented ...

In our latest Short-Term Energy Outlook (STEO), we expect that U.S. renewable capacity additions--especially solar--will continue to drive the growth of U.S. power generation over the next ...

The object is to stabilize energy prices for generations to come by adopting the lowest cost, unsubsidized solar and wind production and distribution systems. We believe it is only a lack of ...

Record sales, increased consumer and utility demand, enhanced federal and state incentives, new product development as support by the President's Solar America Initiative (SAI1), massive ...

Thailand's Ministry of Energy is ramping up efforts to implement a comprehensive National Energy Plan (NEP) aimed at achieving the country's ambitious carbon reduction target of ...

Any municipality that is considering developing new solar projects over the next two years, can receive recognition by providing regular updates to EPA on their project development progress.

The following outline identifies the minimum requirements for a Solar Energy Plan of Development (POD) to be submitted prior to initiation of NEPA analysis (including publication of a Notice of Intent ...

National Development Plan for Solar Power Generation

WASHINGTON -- The Department of the Interior today announced an updated roadmap for solar energy development across the West, designed to expand solar energy production in more ...
