According to this reference for operator new: Global dynamic storage operator functions are special in the standard library: All three versions of operator new are declared in the global ...

Note that if you declared it `var a = new { };` and `var o = new object();`, then there is one difference, former is assignable only to another similar anonymous object, while latter being object, it ...

A new expression is the whole phrase that begins with new. So what do you call just the `"new"`; part of it? If it's wrong to call that the new operator, then we should not call `"sizeof"`; the sizeof ...

Is traction control new or did I just miss those settings? I have a 24 WR250F with the comp ECU and programmer. In the us the wr250 just got the powertune app and traction control for ...

It is NOT "bad" to use the new keyword. But if you forget it, you will be calling the object constructor as a regular function. If your constructor doesn't check its execution context then it won't notice that "this" ...

In the specific case of throw, `throw new()` is a shorthand for `throw new Exception()`. The feature was introduced in `c# 9` and you can find the documentation as Target-typed new expressions. ...

The new keyword in JavaScript can be quite confusing when it is first encountered, as people tend to think that JavaScript is not an object-oriented programming language. What is it? What problems ...

`83 new()` describes a constructor signature in typescript. What that means is that it describes the shape of the constructor. For instance take `{ new(): T; }`. You are right it is a type. It is the type of a class ...

The new operator uses the internal `[[Construct]]` method, and it basically does the following: Initializes a new native object Sets the internal `[[Prototype]]` of this object, pointing to the Function prototype ...
