-----

When Statnett starts upgrading the grid in and around Oslo, we will continue to plan as far ahead as possible. There will be many uncertainties when planning for the distant future, but we will build a ...

Over the years, Hitachi Energy has delivered critical infrastructure to Statnett, including advanced power quality solutions that underpin grid stability. This new collaboration further ...

To this end, Norwegian transmission system operator Statnett plans to invest twice as much in the country's electric power grid over the next 10 years as it did over the previous decade. ...

Using disused mining infrastructure, the Oslo system lifts 8,000-ton concrete blocks during surplus energy periods. When demand peaks, controlled descents generate electricity through ...

Ever wondered how a city known for fjords and northern lights is quietly becoming a global energy storage pioneer? The Oslo Grid Energy Storage Project is rewriting the rules of ...

To prepare for potential failures in a system increasingly reliant on imported electricity, wind, and solar, the company is developing a new system to analyse grid bottlenecks and assess whether relay ...

Hitachi Energy announces today the signing of contracts with Statnett, the Norwegian power system operator, to deliver eco-efficient grid connection solutions in the greater Oslo area.

Hitachi Energy has announced the signing of contracts with Norwegian power system operator Statnett, to deliver eco-efficient grid connection solutions in the greater Oslo area.

With Oslo's population projected to grow by 33%--reaching 1.6 million by 2030--the need for a more robust electrical infrastructure is critical. Statnett's expansion aims to boost the grid's ...

Statnett's grid expansion is crucial as Oslo's population is projected to grow by 33 % to 1.6 million by 2030.

# Oslo grid stabilization

The new infrastructure will help transport 60 % more electricity, securing peak ...
