-----

Before going abroad, Pan Jingong's parents also repeatedly told him to build the country after returning from school. But what does this have to do with solar panels for photovoltaic energy in the future? It ...

With his solid professional knowledge and smart and keen mind, he began to study how to better convert solar energy into electricity. Pan Jingong ...

In 2017, Pan Jingong and his team developed the world's largest single-piece cadmium telluride &quot;power-generating glass&quot; with an annual power generation capacity of 260-270 kilowatt-hours, which began ...

As an engineering student, Pan Jingong has been committed to the research of clean energy power generation. At that time, the research of cadmium telluride thin-film solar cells in ...

Breakthroughs have been made in silicon solar cells, thin-film solar cells, and concentrated solar cells. The energy conversion rate in laboratories has reached ...

In 2017, Pan Jingong's team successfully produced the world's largest single-cell power generation glass . This research and development not only made his company a big hit, but also brought China ...

Recalling the hardships and difficulties of starting a business, Pan Jingong sighed: &quot;Persistence is the most important thing. For more than 10 years, he has devoted all his efforts to the ...

When Pan Jingong returned to the United States with his team, he wanted to thank his mentor in person and ask some questions about cadmium telluride, and prepare to say goodbye to the place where he ...

Chinese scientist Pan Jingong created power-generating glass in the hope of helping the development of his motherland. However, it has been blocked by India and the United States one ...
