For instance, the federal solar investment tax credit (ITC) reduces your federal income tax liability by 30% of what you spent for a solar energy system, including the cost of installation.

Commercial taxpayers may now also choose a Production Tax Credit (PTC) for solar instead of an ITC. The PTC rate is 1.5 cents (adjusted for inflation, it is presently 2.6 cents). The full value of the PTC is ...

The solar Investment Tax Credit (ITC) remains one of the most valuable federal incentives for homeowners considering solar panel installation in 2025. Currently offering a generous 30% tax ...

Congress and President Trump just passed legislation to cut the 30% residential solar tax credit in 2026--nearly a decade ahead of schedule. For homeowners considering solar, act now to ...

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit.

Yes, solar panels are still worth it for the vast majority of U.S. homeowners in 2026 and beyond, despite the end of the 30% federal solar tax credit for some systems. The primary financial driver is the cost ...

Breaking down major changes to federal solar tax credits in 2026 and how homeowners can still access federal incentives through third-party ownership.

Final thoughts on the solar tax credit changes This policy change represents a significant shift in the federal approach to solar incentives for homeowners. But solar energy remains a valuable ...

Choose a lease or PPA and the provider claims it, typically passing savings along through lower payments rather than reducing your tax bill directly. Now, let's break down what ...

Twenty-five states currently exempt solar equipment from state sales tax, reducing upfront installation costs

Photovoltaic panel tax rate

by 4-10% depending on local tax rates. This exemption typically applies to ...
