How does the port of Barcelona work?

In the next two years, the Port of Barcelona will carry out two pilots to test the connections with two types of ships; container ships and ferries. The operation is as follows: when the ship arrives at the dock, it shuts down the auxiliary engines and connects to the shore grid to generate electricity.

Will the port of Barcelona have a 'super plug'?

The Port of Barcelona already has the first "super plug", which allows container ships to turn off their engines and connect to the power grid.

What is a telecommunications generator set?

Diesel and gas generator sets designed to be installed in base telecommunication stations (BTS). Different settings to offer a continuous or backup power supply, according to the requirements of each project. Why are we your strategic partner for your telecommunications projects?

Does Barcelona have a 'super-plug-in' for container ships?

Six years before it becomes mandatory in European ports, Barcelona has already done its homework. Six years before it becomes mandatory in European ports, Barcelona has inaugurated the first "super-plug-in" for container ships in the Mediterranean (PierNext). Hamburg in January and now Barcelona.

The excellence of communication base station generator set generators emerges during remote operations because they combine energy-efficient fuel consumption with sustained power supply.

How to install the battery energy storage system tower of the Port of Spain communication base station
Battery Energy Storage Systems: Main Considerations for ... 5 days ago · This webpage ...

The Port of Barcelona already has the first "super plug", which allows container ships to turn off their engines and connect to the power grid.

The Port of Barcelona has received the first Onshore Power Supply (OPS) substation of the future connection network for ships that is being rolled out with the Nexigen project. It is the centrepiece of ...

Port of Spain communication base station generator set

The Port of Barcelona has launched an ambitious plan to develop the electrification of docks, Nexigen, and thus be able to supply electrical energy of renewable origin to ships during their ...

The Port of Barcelona opened its first Onshore Power Supply system (OPS) at Hutchison Ports BEST container terminal. This equipment, which is the first in a container terminal in a ...

Diesel and gas generators for telecommunications, with high autonomy, low consumption levels and long service intervals.

The Port of Barcelona has officially launched its first Onshore Power Supply (OPS) project for cruise ships, marking a major step in its wider electrification strategy.

The Port of Barcelona has inaugurated an onshore power supply system (OPS) at Hutchison Ports BEST container terminal.

The Port of Barcelona has achieved a major milestone in its Nexige project by receiving the first Onshore Power Supply (OPS) substation. This OPS system enables the provision of ...
