Which sectors consume the most electricity in Morocco?

The industrial and residential sectors are the largest consumers of electricity in Morocco, a trend that has persisted since the beginning of the century. Electricity accounts for 19 % of the country's final energy consumption [7,24]. Fig. 3 illustrates the evolution of electricity consumption by sector in Morocco since 2000.

Why does Morocco import electricity?

Because of that, Morocco relies on energy imports to satisfy the growing domestic demand. The country has traditionally been a net importer of electrical energy, although the net electricity imports have gradually declined. Morocco's energy sector is, nevertheless, in continuous expansion.

What is happening in Morocco's power sector?

The power sector in Morocco has undergone significant expansion over the past two decades, characterized by rising electricity consumption, persistent reliance on energy imports, and a generation mix dominated by fossil fuels.

Does Morocco have a strong energy sector?

Morocco has a modest yet growing energy sector. The country's power generation remained relatively limited in recent years, especially compared to other North African producers such as Algeria and Egypt. Because of that, Morocco relies on energy imports to satisfy the growing domestic demand.
